Officer Don Barber, Provo Police Department, learns rappelling skills as part of the training program for the new "Mountain Rescue Team."

Provo police double as mountain rescuers

By DENISE WADSWORTH
University Staff Writer

The Provo Police Department has started a "Mountain Rescue Team" to help people who are injured or stranded in the mountains east of Provo.

The annexation of the 6,820-acre Heritage Mountain region has made the Provo Police Department responsible for policing the area.

Recently, all members of the rescue team participated in a practical exercise in Rock Canyon to test their capabilities.

"This was a learning process for the men," said Doug Hansen, a member of the Unit. "It's a learning process for the Unit, which helped train the team." The men were willing to give it all they could. They have learned what their capabilities and limits are."

Before forming the new unit, the police department researched the needs of the squad. "We decided we needed training, equipment, and a 12-man team to be effective," Sgt. George S. Pierpont said. "The men need to know how to professionally climb mountains. They receive training in areas such as rappelling, knot-tying and first aid."

Police Chief Swen C. Nielsen said the department has to be ready at anytime to respond to emergencies that may occur in the mountain area.

"We purchased two John Deere snowmobiles and some rock-climbing gear," the chief said. "We also purchased a four-wheel drive truck to make travel in the rough areas easier."

The new equipment cost about \$20,000, Nielsen said.

"If for some reason the land should ever revert back to Utah County, this equipment could easily be liquidated and we could get our investment back," the chief added. "Now, between the snowmobiles and the truck, we should be able to respond quickly with the necessary equipment."

"The team is qualified to bring a person off the mountain to safety," Nielsen added. "We have problems with people being stranded and some fatalities every year in the Rock Canyon area."

Nielsen recalled some personal ex-

periences in the Rock Canyon area as a boy.

"I practically lived in Rock Canyon. When I was 15, I fell into the spring runoff that was roaring out of the canyon. My mother had to pull me out. I have a few memorable scars to remind me of that experience."

In the recent mountain exercise, Jessica L. Jennings, the chief's administrative assistant, posed as "a victim." She was perched on a small ledge, as if she had fallen there.

"The men were competent in getting me off the mountain," she said. "I pretended to be unconscious with a crushed collarbone, head injuries and a fractured leg. I was loaded onto a litter and lowered 100 feet down the mountain. I was scared to death."

The men are trained primarily in the areas of Rock Canyon, an area where several BYU students have fallen to their deaths in recent years.

"We look for men who have a lot of stamina, those who will give the extra push to do an excellent job," Nielsen said.

The rescue team consists primarily of the tactical squad and other members of the police department.

"The squad is operated on a volunteer basis," Pierpont said. "The officers get no extra pay for their efforts. They are paid for their training on their own time. It's a sideline to their regular police jobs. Our main goal is to become professionals."

Pierpont said the recent exercise was a great learning experience. "We found out what we are capable of doing. We have all learned a great deal about the search for and rescue of victims stranded in that manner," Pierpont said.

Officer John Alfred said, "We learned about our capabilities, and we know how to work as a team. Now we are prepared to work with each other in rescue operations." The team had its first rescue in July. A boy was stranded in an old mine shaft in the Buckley Mine in Rock Canyon. "We were successful in that rescue," Pierpont said.

Officer Randy Johnson said, "It's a pleasure to be on the team. For once, I'm the good guy and not the bad policeman. When I was lowered down to assist the kid in the mine, he was really glad to see me."

Senate passes tax cut; Carter threatens veto

WASHINGTON (AP) — The Senate passed a \$29.3 billion tax-cut bill Tuesday that was bloated so far above the level recommended by President Carter that he threatened to veto it.

The measure, approved 86-4, includes reductions for virtually all individuals, with benefits tilted toward those with incomes under \$50,000 a year. In addition, it contains major tax cuts for investors, which the Senate refused by a lopsided margin to scale down and for business.

The Senate bill would give a \$265 million tax cut to a single family with a \$20,000 income and deductions totaling 23 percent of income. The House bill would give the same family a \$146 tax break. A single person earning \$20,000 would realize a \$114 tax reduction, or \$9 more than in the House bill.

Carter told a news conference he would not veto the bill if it was a tax cut if he thought it too expensive or failed to meet the basic criteria of simplicity, fairness and equity.

Carter said the House-passed, \$16.3 billion bill meets his budgetary guidelines. But, he added that the \$29.3 billion Senate bill "would not be satisfactory in its present form."

The four senators voting against the bill were Mark Hatfield, R-Ore., Ernest Hollings, D-S.C.; Howard M. Zemah, D-Ohio; and James Abourezk, D-S.D.

The Senate legislation is almost certain to be reduced when it goes to a House-Senate conference committee.

By a 73-18 vote the Senate added to the bill an expanded tax break for disabled persons and those 55 and older

who sell their principal home and don't buy a new one costing at least as much. Once in a lifetime they could keep tax-free a profit of up to \$100,000 on such a sale.

That amendment would eliminate the relief voted by the Finance Committee for all homeowners who sell their homes. The committee plan would have exempted from taxes the profit from the first \$50,000 of selling price — regardless of the age of the seller — and a proportionate amount on more expensive homes.

As senators headed into the final hours of debate on the tax bill, almost no room was left in the budget for ad-

ditional tax cuts in 1979. But there was no bar to amendments that would take effect in later years.

The House passed a \$16.3 billion tax cut in June. The Carter administration trimmed its original \$29 billion recommendation and proposed that the Finance Committee hold the 1979 cut to about \$20 billion. The Finance Committee voted in favor of a \$22.9 billion cut. The figure was increased to \$30 billion by virtue of Senate floor ac-

tions. The Finance Committee bill would result in revenue losses of \$65.9 billion in the 1983 budget year. But Senate

amendments would push the cost to \$144 billion, Muskie said.

The Senate voted 82-10 against an attempt by Sen. Edward M. Kennedy, D-Mass., to scale back the committee's proposed cut in capital gains taxes to about the level approved by the House.

Kennedy said the committee's proposal would be a windfall for a handful of high-income investors.

"These beneficiaries are dear old people who sell their farm and get a one-time gain of \$200,000," said Sen. Russell M. Long, the committee's chairman. "They're not all millionaires."

Carter may OK tax compromise

WASHINGTON (AP) — President Carter has now decided he won't vote to veto a \$30 billion tax-cut bill he considered by the Senate, but could accept a compromise that comes closer to the \$16.3 billion House version.

Carter told a nationally-broadcast news conference he will meet Wednesday at the White House with Sen. Russell Long, D-La., and Rep. Al Ullman, D-Ore., the heads of the tax-writing committees, to try to work out a compromise he can sign.

"Hopefully, the three of us can agree on an acceptable package," the president said.

Carter said he would accept a bill that is fair and progressive, and combines "the best elements" of the Senate and House measures.

On other matters, the president conceded it is now "unlikely" that Congress will approve his proposal to create a new federal Department of Education before it adjourns this weekend.

And he hinted that conclusion of an Egyptian-Israeli peace treaty could depend to some extent on the speed with which the Israelis move to end their military government in the occupied West Bank and to replace it with a proposed self-governing authority.

Carter said the Egyptian-Israeli treaty talks which open in Washington Thursday "are not legally interlocked" with the West Bank issue.

"But I think throughout the Camp David talks and in the minds of myself, Prime Minister (Menachem)

Begin, and President (Anwar) Sadat, they are interrelated," he said.

Carter said there is "no doubt" in my mind that both issues will be discussed during the Egyptian-Israeli treaty talks.

Carter also acknowledged indirectly that the CIA has been making payments to Soviet defector Arakady Shevchenko, but denied that the agency was paying the full \$5,000 per month allegedly paid to a female companion of the Russian defector.

"The payments... don't equal what the woman said were paid for her favors or services," Carter said.

The president also said he has not decided whether he will submit a U.S.-Soviet pact on strategic arms limitation to Congress as a treaty, but "my preference" is to do so.

'High' rumor denied

Utah divorce rate low

By MARGARET WILSON
University Staff Writer

A BYU professor has discredited the "rumor" that Utah has the highest rate of divorce in the United States.

Dr. Kenneth L. Cannon, a professor of family relations who has researched this rumor for almost 20 years, said this is "just another piece of folklore that got started and refuses to die."

It is a fact, Cannon said, that the West has a higher rate of divorce than the rest of the country. "But," he added, "Utah's divorce rate has been consistently lower than the rest of the 13 western states."

According to the 1977 statistical abstract of the United States, the 10 states with the highest divorce rates in 1976 were Nevada, with a 17.9% rate of divorce per 1,000 people, followed by Alaska, Arkansas, Arizona, Wyoming, Oklahoma, Florida, New Mexico, Washington and Oregon.

The divorce rate, measured by the number of divorces per 1,000 people, for the United States in 1976 was 5.0. Utah was only slightly higher than the

national average with 5.1. Instead of being near the top, Utah actually ranked 27th in the nation in 1975 and was next to the lowest in the 13 western states. Only Hawaii had a lower divorce rate in the West, according to the statistical abstracts.

Cannon said he has discovered five separate occasions when a statement was made by a credible source regarding Utah's allegedly high rate of divorce.

"What's unfortunate is the statement is always made by professional people whose opinions are respected by the public," he added. "That makes it harder to 'kill the rumor.'

"The first time I encountered a statement about Utah's high divorce rate," Cannon said, "it was made by a visiting general authority at a conference in Ogden. Cannon said he countered the rumor again when the president of the National Council of Family Relations mentioned the high divorce rate in a speech at BYU. He also recalled a physician from the Utah State Mental Hospital quoting the bogus statistic at a PTA meeting.

"Utah has the third highest divorce rate in the nation," was another "false statement" made on KSL television two years ago and attributed to a Salt Lake County clerk. Cannon said he checked with the county clerk who gave his source as "a visiting statistician from the federal government." Cannon said he researched the rumor again and found it to be untrue.

The most recent question about Utah's divorce rate came last week when an LDS businessman called Cannon after receiving a Kennebunk Copper Corp. bulletin stating that Utah is the No. 1 state for divorces. "Kennebunk," Cannon said, "has a fine marriage counseling and child abuse clinic and publishes a bulletin that is sent to many American corporations."

My biggest worry is how uninformed Latter-day Saints are about the divorce rate within the Mormon religion.

Cannon said he fears that since the church doesn't publish much information on divorce rates, church members will make parallels from the rumors they hear, rather than rely on the known statistics.

Provo firefighters get a 'lift'

Provo City firefighters demonstrate their newest piece of equipment to elementary school students. The snorkle truck, which cost Provo City \$100,000, is being displayed as part of Fire Prevention Week in Utah County.

Antique firefighting equipment has also been dusted off and placed on display, along with presentations on fire prevention, all this week at the University Mall in Orem.

In the news...

Warnke resigns

WASHINGTON (AP) — Paul C. Warnke has resigned as chief negotiator for a strategic arms limitation agreement, the White House announced Tuesday.

The resignation will take effect later this month and is for personal reasons, a statement from the presidential press office said.

Warnke will accompany Secretary of State Cyrus R. Vance to Moscow for strategic arms talks later this month and will leave his post shortly thereafter.

Cease-fire endures shootouts

BEIRUT, Lebanon (AP) — A hour-long shootout between Syrian troops and Christian militiamen and outbreaks of sniper fire Tuesday failed to undermine the three-day-old cease-fire in east Beirut.

'Yom Kippur' begins

JERUSALEM (AP) — Israelis began observing Judaism's holiest day Tuesday, as shops closed, public transportation halted and thousands flocked to synagogues for evening prayers to usher in Yom Kippur.

The military command announced that Israel was closed to travelers from the occupied West Bank of the Jordan River and the Gaza Strip. Police issued warnings to the public to beware of suspicious objects.

Court reviews hiring decision

WASHINGTON (AP) — The Supreme Court Tuesday agreed to decide whether veterans employers who give hiring preference to military veterans are discriminating against women.

The justices said they will review a decision by a three-judge federal court in Massachusetts which in 1976 outlawed such preferential treatment as unconstitutional sex discrimination.

The court's eventual decision will carry broad impact. Every state but four — Arkansas, Mississippi, New Mexico and South Carolina — has a form of veterans' preference in hiring for public jobs.

In Utah...

Escapes suspected in kidnapping

SALT LAKE CITY (AP) — A Salt Lake County teenager says he was abducted at gunpoint Tuesday and escaped with two others he identified as escaped Utah State Prison inmates.

C.B. Olsen, prison control sergeant, confirmed two inmates escaped about noon, probably from the prison's minimum security farm. He identified them as Phillip Lacks, 24, serving a 1-5 year term for burglary, and Lewis Malek, 25, serving a prison term for manslaughter.

\$50 million promised CUP

SALT LAKE CITY (AP) — A compromise has been reached with the White House to provide Central Utah Project funding at \$50 million, \$2 million less than in the proposed two works bill, Rep. Gunn McKee, D-Utah, said Tuesday.

This would be \$12 million more than President Carter had originally proposed for the project.

Boy tried as adult?

FARMINGTON (AP) — Paul Borrego Jr., 13, may be tried for attempted criminal homicide if Davis County officials succeed in certifying him as an adult.

A petition filed in 1st District Juvenile Court asks that Paul Borrego Jr. stand trial as an adult, alleging he shot Trophee Ralph Evans on Oct. 7.

Trooper Evans was listed in serious but stable condition at LDS hospital Monday.

On campus...

Politicians to speak

Republican Congressional candidate Jed Richardson, Attorney Oscar McConkie and Republican National Committee woman Amy Valentine will speak today as part of BYU Political Week.

Richardson, a former dean of students at Snow College, will speak on political views in the East Ballroom ELWC at 10 a.m.

At noon in the Varsity Theatre, McConkie will speak on "Law, Politics and the Church." McConkie is an author and former president of the Utah State Senate.

Mrs. Valentine, a BYU Spanish teacher who has been involved in politics for 30 years, will lecture on the topic "Behind the Scenes in Politics" at 3 p.m. in 347 ELWC.

Newspoint or toilet paper?

A promised shipment of newsprint for BYU Press has been mistaken as toilet paper and misrouted.

Dean Cox of University Press said the newsprint arrived by rail, but the boxcar was left at the wrong loading dock. The newsprint was left at a dock which could not handle the equipment necessary to unload the paper.

Cox said it will be Wednesday morning before the newsprint is unloaded and delivered to the BYU Press. During the last couple of weeks the Daily Universe has been printed on various sizes of paper.

Navajo workshop today

The Department of Higher Education of Window Rock, Ariz., is sponsoring a Navajo Indian scholarship funding workshop and banquet at BYU today.

The workshop will be from 1-4 p.m. in 160 Brinham Hall. During the workshop students will be able to question funding agencies concerning scholarships and changes in the programs.

The banquet will be a 6 p.m. in 396 ELWC. It will include entertainment, awards presentation, and guest speaker Raymond Tsosie from the Navajo Nation.

Teaching fees due

Students are urged to apply early for Winter Semester 1979 elementary and secondary student teaching and special education practicums.

The application period extends until October 25, but students are encouraged to get their packets in early because officials in the Teacher Clearance Office say long lines form during the last week of the application period.

Potential teachers must purchase a student teaching packet at the information desk on the second floor of the bookstore, have it checked and cleared by the Teacher Clearance Office (TCO) and pay a \$50 fee.

The TCO is located in 120 MCKB.

Family, son to reunite thanks to Carter bill

By TRACY MOWER
University Staff Writer

President Carter signed into law yesterday a little-known bill that means a family will receive much public notice, but for an Orem family it means they can be reunited with their new son after more than seven months.

"Everything goes all right," Robert David will be told by Sandra, "she said Cheryl B. Chase Shephard of Orem.

Robert, David, the Shephards' 10-month-old, newly-adopted son, is currently living in a Costa Rican orphanage. He is one of five children the Shephards have adopted from Costa Rica.

It started in October of 1977 when Shephard's wife, Sandra, went to Costa Rica to investigate adoption possibilities on a neighbor's recommendation. She visited several orphanages and selected a girl. Another couple, however, persuaded the Costa Rican authorities to give the girl to them. When Mrs. Shephard returned to finalize the adoption arrangement, officials informed her there were no more children available.

A placement in the Costa Rican adoption agency, described by Mrs. Shephard as "one of these squat little young grandmothers with a heart of gold," took an intermediate turn in the Shephards' case. She arranged for the adoption of a girl who had two sisters, on the condition that the Shephards would take all three girls.

The Shephards started the adoption process for the girls, Sarah, 7,

Univers photo by Deva Lill

Sandra Shephard cuddles DeDe and Marie, two of her adopted children from Costa Rica. President Carter signed a bill Tuesday which will allow the Shephards to adopt another child, Robert, currently in an orphanage in Costa Rica.

DeDe, 3, Marree, 1, and Robert David, then one month old. In the meantime they began arrangements, with the placement agency to adopt two-year-old boy named Danny. They left Costa Rica in February with the three girls, leaving Robert David with the adoption agency.

"We called every week after we were home and they would always say 'one more week,'" Shephard says.

Finally they received word they could adopt Danny in June.

When Shephard arrived in Costa Rica, he was informed that a memo from President Carter, sent just two weeks earlier, had imposed a two-year ban on non-preferential visas, the type Shephard needed to get Robert David out of the country. Shephard was told by the American consul general in Costa Rica that she was the only one who could lift the visa freeze.

Shephard left Costa Rica with Danny and didn't receive word until Tuesday that the President had signed the bill that passed through the House and Senate with little contention.

The Shephards are now awaiting the final step of the visa freeze.

ELECTION '78

Holley, Ferre battle for county sheriff post

Stressing education, training and experience, Utah County Sheriff Mack Holley is seeking re-election on Nov. 7.

Holley, a life-long resident of the Valley, was appointed county sheriff six years ago at the death of former County Sheriff Ralph Chapple. Holley was elected sheriff in 1974 and has been involved in police work since 1969.

"I became acquainted with law enforcement while serving as the Spanish Fork judge of the peace," Holley said. "When I heard there was an opening on the county force, I applied. I've been involved ever since."

Holley holds a bachelor's degree in police science from Weber State College and has taken several classes in specialized training since his appointment.

MACK HOLLEY

Holley's platform includes plans to strengthen the patrol and detective divisions. He said he would also like to provide contract police service to small outlying towns which have no police.

"Service to the citizen is the thing I am most interested in," Holley said.

Mike Ferre, Pleasant Grove sheriff of 10 years, is emphasizing a need for better administration in his bid to unseat Mack Holley for the position of Utah County sheriff.

"It's true that police officers in the field need to be able to make their own decisions," Ferre said, "but it is important that some things be taken care of by those in charge."

Ferre, an 11-year veteran as police chief, proposes to create written policy procedures for county police officers and to make "more effective use of the public writing system."

"This day and age, if you don't have written policy and procedure guidelines, you're in real trouble," Ferre said.

Ferre also plans to consider a re-allocation of personnel within the sheriff's department in order to provide more police coverage

MIKE FERRE

throughout the county. "The sheriff's budget has increased by over 30 percent since I came," Ferre said, "but there are still times at night when there are only one or two men on duty."

In addition to his position as Pleasant Grove police chief, Ferre serves as president of the Utah State Chiefs of Police Association.

County constable candidates describe office

Wilford 'Bill' Hansen

Wilford 'Bill' Hansen, Democratic candidate for county constable, is a second year law student at BYU and a Robert Clark Law School and is presently serving as constable in Salt Lake City.

"The office of constable is involved in more than serving warrants for delinquent traffic violations," Hansen said. "The constable is responsible to his court to serve any necessary papers required to fulfill the court's function."

The office of constable was created last March by the County Commission and the Circuit Court. Hansen was nominated in the November election is Republican Don H. Forsyth, who was appointed when the position was created, and presently holds the position.

Hansen said he feels the constable should be "legally qualified" to serve. "That requires legal training as well as experience," he said.

"The constable should not act like a police officer, after all, he isn't one. He doesn't arrest anyone," he said. "My campaign slogan is, 'You deserve a fair trial, but your neighbors don't have to know about it!'"

Wooton, Christensen seek attorney's office

Noall T. Wooton

A reduction of Utah County's crime rate has been the top concern of the attorney's office and will continue to be so," Noall T. Wooton, candidate for re-election to the office, said.

Wooton, an American Fork attorney, will face Casey Christensen, Payson, Nov. 7.

"The county attorney's office has increased the number of felony convictions within the county by 120 percent and has concentrated its efforts in the area of violent crime," he said.

"I have initiated several new programs which are reducing crime. I want to be re-elected because they have just been started. For the first time in the history of Utah County there was a net decrease in the crime rate in 1977."

Some of the programs include a career criminal program, aimed at efforts to reduce the number of habitual criminals; a public education program, which will help citizens protect themselves; and an effort to apprehend delinquent husbands who fail to pay alimony or child support, Wooton said.

Don H. Forsyth

The current Utah County Constable, Don H. Forsyth, was appointed to the newly-created position in January, and will be seeking to retain his position in the Nov. 7 election.

Forsyth, who is running on the Republican ticket, will be challenged by Democrat Wilford Hansen.

A native to Utah County, Forsyth was named as constable by the county commissioners in March. He has served as a member of the Utah County Fair for two years, and said that helping him gain necessary organizational skills for his position. He is also a member of the Utah Constable Association.

The constable's main responsibility is to serve arrest warrants, he said, a job that "requires communication skills."

Forsyth received a data processing and system analysis degree from Weber State College in Ogden, and has worked as a computer programmer.

Casey Christensen, Democratic candidate for county attorney from Payson, said he wants to bring more full-time commitment to the county attorney's office and "save taxpayers money by careful administration."

Christensen, a Payson attorney in Payson, said the Authors Annual Financial Report of Utah County shows a 28 percent increase in the county attorney's budget between 1977 and 1978.

"The number of crimes has increased, the county attorney's salary has increased, but the number of cases handled has stayed relatively the same," he said.

He said the number of crimes classified as serious have increased less than 10 percent, and the "money spent by the office has increased at a greater rate."

Christensen has managed two law practices, one in Albuquerque, N.M., and one in Provo.

Life in papal conclave described by cardinal

The 111 cardinals entering the conclave Saturday evening will reach into a leather sack held by Cardinal Mario Ciappi, and pick out a numbered wooden ball that decides their room assignments.

"The room I had was really quite grand, with magnificent tapestries and paintings," said Carberry. "The chairs were done in red plush and gold leaf. I was afraid to sit on them, so I used a sofa up-chair. There were also two air conditioners, but I only used one."

Others were billeted in tiny cubicles of splendid parentage, rooms names like the Room of the Signatures where papal decrees are signed — the Room of the Mysteries and the Room of the Sibyls, in 1503 Pope Julius II imprisoned Cesare Borgia, the Italian Renaissance adventurer and son of Pope Alexander VI.

Carberry said a loud electric bell, "which rang through the night and changing classes," summons the cardinals to the Sistine Chapel at 9:30 a.m. and 4:30 p.m. for the voting. It is the only jarring note in a world of surorous prayers, soft conversation and light footfalls.

"If you don't have an alarm clock, you have to depend on the fellow in the next room to wake you," said Cardinal James Carberry of St. Louis, who said he is accustomed to sleeping himself thinking down in the elaborate Borgia apartments for the second time in six weeks.

The first conclave since Alfonso Lusignani to follow Pope Paul VI, who died Aug. 6, Lucia, who chose the name John Paul I, died 34 days after his election.

"I'm 74. I never dreamed I'd have this experience again in my lifetime," said Carberry.

New food stamp rulings have tighter restrictions

WASHINGTON (AP) — New federal food stamp regulations ordered by Congress last year will take effect by Jan. 1, and will include elimination of a current requirement that poor families spend part of their incomes to get benefits, Agriculture Secretary Bob Bergland said today.

Meanwhile, the rising cost of groceries will mean a further increase in government food stamp benefits on Jan. 1. Agriculture Department officials said.

Bergland told a news conference that the theme of the new law and the regulations "is to eliminate those who should not be receiving food stamps, while assuring that we do get food stamps to those who are truly in need."

In July, the most recent month tabulated, about 15.3 million persons benefited from food stamps, he said.

Bergland said an estimated 3 million persons not now getting food stamps will be added to the program as the new rules take effect, mostly low-income working people and elderly persons.

But the tighter restrictions will probably eliminate a million higher-income persons from getting stamps, he said. That means a net of about 2 million persons may be added to food stamp rolls because of the new regulations.

A Bergland aide, Bob Greenstein, said the food stamp program, for the new fiscal year that began Oct. 1, probably will cost about \$6 billion, compared with approximately \$5.5 billion in 1977.

Greenstein said part of the expected increase will be due to a boost in food stamp allocations that will take effect Jan. 1.

Oil, gas industry growth hindered

"Strangulation by Regulation" was the topic of Glenn E. Nelson, guest lecturer in the third session of the Executive Lecture Series Tuesday.

Nelson, chairman of the board for Husky Oil Ltd., told students that government regulations placed on the oil industry are the major cause of the ever-increasing prices of gas and oil.

According to Nelson, problems started when government regulatory agencies assumed that oil companies had a monopoly when they had a distribution system of oil and gas within a community.

"That's when the trouble began," Nelson said, "because regulatory bodies have a way of ignoring the natural laws of the marketplace."

One problem which resulted from regulatory agencies was that exploration of new energy resources had been prohibited, according to Nelson. He said funds were sent overseas where vast new reserves of oil were discovered. As a result, the U.S. lost the benefit of domestic exploration and development.

Nelson said the United States is now dependent on other countries for 50 percent of their oil needs. This problem was escalated when foreign countries raised the price of oil in 1973, from \$3 to \$21 per barrel before settling back to the current \$13.50.

Political policies discussed, defined

By FRANK RIGBY
University Staff Writer

To dispel rumors that there is no difference between the Democratic and Republican parties, the Young Democrats and College Republicans were together Tuesday afternoon in the Polysian Room of the Wilkinson Center to defend their policies.

The confrontation, in the form of a panel discussion sponsored by the ASBYU Academics Office, featured the leaders of the rival political clubs in an attempt to answer "What is a Democrat?" and "What is a Republican?"

"The Democrats are the party of the common people," said Young Democrats Club President Art Heikkila, a graduate student in public administration from Phoenix, Ariz. "Democrats believe the solution is in the system."

Heikkila outlined the philosophy of a democrat by quoting the late Hugh B. Brown, a former apostle in the LDS Church. Brown said, "If I wanted to belong to a party of the common people, I would be a Democrat. If I wanted to be popular with richer people, I would be a Republican."

Heikkila said, "The Democrats are the working man's party. The party believes in and supports the average person."

Miss Whitehead said the Republican Party stands for the conservative philosophy.

"Republicans recognize that man and the system is basically corruptible and he needs a system of checks and balances."

She said, "Republicans support limited government, free enterprise and their candidates for return of power to the people."

This week both parties will be set up in the Reception Center of the Wilkinson Center. Representatives of each party will review their respective parties and their candidates for the upcoming final election on Nov. 7, said Adam Self, Political Week chairman.

Also, a table will be set up Friday and Wednesday, Oct. 18, where students may register to vote in the final election.

Marriages on Dec. 20?

Temple may remain open

Those desiring to get married in the Provo Temple Dec. 20 should contact the office of the dean of Student Life by Thursday.

President Dallin H. Oaks in his Oct. 3 formal announcement said the Provo Temple program is considering opening the temple Dec. 20 for marriages only. The presidency wants to be sure there is sufficient interest before asking temple workers to postpone their vacations, he said.

Dean of Student Life J. Elliott Cameron said many students have ex-

pressed interest in the Dec. 20 date. "We've even had some single students come to us because they want to see if they can find someone to marry before Dec. 20," he said.

"All the local temples will be closing Dec. 16 except the Salt Lake Temple, which will be open Dec. 19 for marriages only," Cameron said.

He said those interested in being married in the Provo Temple Dec. 20 should see his secretary in A-209 ASB. Interested students will be informed once the decision has been made, he said.

Dean of Student Life J. Elliott

Cameron said many students have ex-

Students cautioned on voter registration

Students registering to vote in Utah elections on Nov. 7 should be aware of difficulties which may arise from establishing Utah residency.

According to Utah County Clerk William F. Huish, voter registration in Utah automatically causes students to lose residency in their home states. Consequently, students returning home would have to pay non-resident rates for state colleges and universities, and may also lose state-sponsored grants and scholarships. Veterans benefits may also be affected.

Huish encouraged out-of-state students to write to the county seat in their home states and register to vote absentee by mail.

For those students who want Utah residency, voting districts will hold registration sessions in the individual voting districts on Oct. 14, 17 and 31.

The registrar for District 35, which encompasses on-campus housing, is located at 876 E. 900 North, Room E, Lee Apartment No. 11. For District 47, which includes Wymount Terrace, registration will be at 6-320 Wymount Terrace.

Students living in or near the Riviera, Pineview and Canyon Terrace apartment complexes may register in the Orange Room at Riviera for District 30. Those living in or near Centennial, King Henry and Brownstone can register at 432 N. 800 East for District 63.

Students may also register at the county clerk's office at the Utah County Building, 51 S. University, until Oct. 27, Monday through Friday from 8:30 a.m. to 5 p.m.

In order to be eligible to vote in the Nov. 7 election, a person must be an American citizen, 18 years of age or older, and a resident of Utah and of the district in which he or she intends to vote for at least 30 days prior to the election.

Y students to serve in mock state senate

Four BYU students will serve as officers in the Utah Intercollegiate Assembly in November.

Dan Adamson, a law student from Jerome, Idaho, was elected governor. Randy Kester, a junior in political science from Santaquin, was elected secretary of state.

Rick Wheeler, a sophomore from Salt Lake City, was elected attorney general, and Dane Leavitt, a transfer student from USU, was elected president of the Senate.

Participants in the Utah Intercollegiate Assembly serve a three-day term in a "mock legislature" at the State Capitol Building. During this time each delegate presents a bill to be discussed in committee and put to vote on the "mock" House or Senate floor.

The five top resolutions are given to the state legislature. Last year the UIA's top resolutions concerned tuition issues, increased library allocations, reading improvement programs and transfers of credit.

The purpose of the program is to "do something to help solve the problems of the state, and let the students learn something," said Dr. Lee Farnsworth, professor of political science.

Participants in the UIA are enrolled in Pol. Sci. 318R where they are instructed on the nature of the state office. A collection of real problems in Utah are given to the students and they submit their answers to the state legislature.

Westminster hears call for normalcy

Westminster College President Helmut Hofmann has called for a "return to normalcy" at the Salt Lake City private college where three fires thought to have been set by an arsonist have occurred in three days.

Hofmann told students Monday at a special meeting that increased security measures have been undertaken following the fires that sent 13 persons to area hospitals.

He said five more private security guards have been hired. Salt Lake City police have been asked to increase campus patrols, and the school is studying the possibility of creating its own police force.

Meanwhile, police and fire officials continued searching the campus for clues to the cause of the fires. Salt Lake City Fire Department Battalion Chief Eldon Marshall said the fires probably were started by students, possibly a student at the school.

"There are several suspects," Marshall said. "These are the types of fires where there is nothing to gain except, perhaps, revenge — getting even with somebody."

"Most of the suspects are students at the school," he said.

Early Saturday fire broke out in the Carlson Hall lounge area, sending smoke and heat to the upper floors of the three-story building where students were sleeping. Eight students and two city police officers were treated for smoke inhalation and injuries.

Fire Prevention Week begins

By DENISE WADSWORTH
and TRACY MOWER
University Staff Writers

On a warm Sunday evening in the fall of 1871, a thoughtless, careless act sparked a fire in a modest city home. It seemed easy to control, but 30 hours later, 2,100 acres of Chicago were a blackened, smoldering waste. That fire is still remembered today.

To mark the Chicago blaze, Fire Prevention Week is observed annually during the week of October 9.

In commemoration, Provo and Orem fire departments are working this week to educate citizens and students in fire prevention. The main purpose of Fire Prevention Week, Provo Fire Chief Stanley Brown said, is to help people become aware of fire hazards in their own homes and offices as well as other property, and aid in the prevention of future disasters.

The Provo Fire Department decided to start young. A coloring and essay contest, sponsored by the department, requests all third-grade students in the city to complete a fire safety check list of their house in picture form, and turn them in for competition.

"There is really no way to tell if this type of program is really effective, but in the past there have been fewer fires in the area."

During fire week, area schools administer fire drills, and Brown said firefighters check schools for closed doors and windows.

"Ninety percent of fire victims die without a burn on them," Orem City Fire Marshal Brent Halladay said. "Modern plastics in today's households put off poisonous gases when burned, and when inhaled they're fatal."

Antagonist of ERA to address students

By FRANK RIGBY
University Staff Writer

ERA opponent Phyllis Schlafly will speak at 10 a.m. Thursday in the main ballroom of the Wilkinson Center.

Mrs. Schlafly, a national leader in the opposition to the ratification of the Equal Rights Amendment, will address the subject, "A Viewpoint on Women's Issues."

"Mrs. Schlafly's speech is the biggest event of our political involvement project," Ernest Richter, ASBYU Academics Office vice-president, said.

A resident of Alton, Ill., Mrs. Schlafly is recognized as a national leader and spokesman for American women. As a women's liberation opponent, she has appeared before legislatures of the state legislatures which defeated the ERA and in public debates with most of the top advocates of women's lib ERA.

Mrs. Schlafly is heard twice a week on "Spec-trum" for the CBS Radio network, and each other week on "Matters of Opinion" for radio WBBM in Chicago. She has participated in

Phyllis Schlafly

television interviews and debates on all three major networks and in most major cities from New York to Honolulu.

Since 1967, Mrs. Schlafly has written a monthly newsletter called "The Phyllis Schlafly Report." Her newspaper column appears twice a week in the Phoenix Gazette and other newspapers.

Mrs. Schlafly is the co-author with Admiral Chester Ward of "Kissinger on the Couch," a detailed analysis of Kissinger's foreign and defense policy. Her three books, "The Gravediggers," "Strike From Space" and "The Betrayers," made a series of predictions

about the Soviet nuclear buildup and the U.S. nuclear decline which have since come true.

Since World War II, she has studied military affairs and has worked her way through college as a gunner and ballistics technician. She has testified on defense and the U.S.-Soviet treaties before the Senate Foreign Relations and Armed Forces Committees.

Mrs. Schlafly holds a bachelor's degree from Washington University, a master's degree from Harvard University in political science. She has received seven honor medals from the Freedoms Foundation of Valley Forge, a "Woman of Achievement" award in public affairs from the St. Louis Globe Democrat and the Brotherhood Award from the National Conference of Christians and Jews.

Mrs. Schlafly is the wife of an attorney and the mother of six children.

Before her 10 a.m. speech, Mrs. Schlafly will participate in a press conference in the office of KBYU television.

Y debater receives honors as forensics season opens

University debaters began the senior year recently at the University of Wyoming and the University of Northern Colorado, with the BYU debaters turning in impressive performances.

Kim Wong, a sophomore from Provo majoring in business, and Clifford D. Henke, a senior from Spokane, Wash., majoring in communications, tripped both tournaments.

There were 50 schools from over 20 states in competition.

Don Black, director of forensics, said, "One of the awards that Kim Wong won makes him one of the 10

best debaters in the western U.S. and possibly in the nation."

BYU was one of five schools honored as outstanding participants at the tournaments, along with Northwestern University, the University of Pittsburgh, Wright State and the University of Utah.

Jim Paulsen, one of BYU's debate coaches, said, "This is certainly the best showing BYU has made in the last five or six years. It's certainly a hopeful beginning to the season."

Cougar debaters are scheduled to compete at California State at Fullerton and Kansas State at Emporia in the next two weeks.

Korean culture to be discussed

The manager of Translation Services for Korea will address the subject "Korean Culture and Korean-American Understanding" today at 3 p.m., 205 JRCB.

Sam Han, the former mission president of the Korean Korean Mission, is being hosted on campus by the Asian Studies Program of the Center for International and Area Studies in cooperation with the Religious Studies Center at BYU.

Han is a pioneer for the LDS Church in Korea in many areas, according to Dr. Spencer J. Palmer, director for World Religions and International and Area Studies.

While serving as the first Korean missionary, Han translated the Book of Mormon into his native tongue.

Han was the first Korean to be called as a regional representative and was also called to start the Pusan Mission in Korea.

The oldest of 13 children, Han quit school early in his childhood and worked so his brothers and sisters could finish their educations. His father was forced to hide from the Communists during the Korean War, and support of the family fell on Han.

After his speech, Han will attend a reception in his honor from 4 to 5 p.m., 205 JRCB.

lights, lightning bolts, spinners, and mirror balls. Dance to the world's finest discotheque or just enjoy the light show. Star Palace is the Ultimate Discotheque.

Wilson to start**Y to face Oregon**

Marc Wilson will be the starting quarterback Saturday when the Cougars meet the Ducks of Oregon, said BYU head football coach LaVell Edwards Tuesday.

Edwards told sportswriters at a statewide luncheon this week that he would go with Wilson and then "see what happens from there."

The Cougar coach also said BYU has several injured players who could be out of the Oregon game. Nick Eyre, who injured his knee in the game with the Utah State Aggies, will definitely be out of Saturday's lineup and may have to undergo surgery.

Several other Cougars are nursing aches and pains. Wide receiver Mike Chronister has a broken rib, while Matt Mendenhall, a defensive end, has a shoulder pointer, and cornerback Dave Francis has a hip pointer.

All the injured players, with the exception of Eyre, are expected to make the trip to Eugene for the game against the Ducks.

Change in lineup

Edwards said, "There won't be much change in our lineups except on the offensive line. Tom Bell has been moved to right tackle to replace the injured Eyre and Randy Tidwell (6-3, 235) will play guard in Bell's place."

Mark Swenson, who started at strong safety against USU, will be the starter again this week.

The Oregon contest should be a tough one for the Cougars, said Edwards, even though Oregon has yet to win a game this season. Edwards said he hated to use a cliché but said that the Ducks are "the best 5 team in the country."

The Ducks lost to California last week in a game they thought they would win handily. Oregon had an 11-0 lead over the Bears in the first half, but watched the game slip away 21-18 when California completed a game-winning touchdown pass with less than 1:30 left in the contest.

"In the last three weeks we have lost three games in the final minutes," said Rich Brooks, coach of the Ducks. Two weeks ago the Ducks played a strong

L.A. wins opener on Lopes' homers

Davey Lopes walloped a pair of homers, driving in five runs, and Dusty Baker added a solo shot, leading the emotionally-charged Los Angeles Dodgers to an 11-5 victory Tuesday night over the New York Yankees in the opening game of baseball's 75th World Series.

Longtime RBJI were one short of the Series to Gilmillan and now layed the victory that came on the eve of the funeral of popular Dodger coach Jim Gilliam.

The Dodgers dedicated this Series to Gilmillan and wore black patches with the No. 19 on their sleeves in memory of their coach, who died of a brain hemorrhage Sunday.

Dodgers star Tommy John held the Yankees to only two hits through six innings, before leaving the game in the seventh, to picked up the win. John helped the Yanks on curves and sliders which forced New York to constantly hit ground balls in the infield.

Designated-hitter Reggie Jackson spoiled John's hope for a shut-out when he clobbered a one-run blast over the right field wall to lead off the seventh inning. The homer by Jackson, who hit five in the World Series a year ago against the Dodgers, ended a string of 23 consecutive home-runless innings by John that had stretched through the end of the regular season and into the National League playoffs against Philadelphia.

The 15-hit Dodgers barrage against four Yankees pitchers gave Los Angeles the opening-game victory in the best-of-seven series which continues tonight at Dodger Stadium.

L.A. given okay as Olympics site

The International Olympic Committee announced its final approval for Los Angeles to stage the 1984 Summer Olympic games by an overwhelming margin.

The special mail ballot among IOC members, which also drew eight abstentions, ap-

proved a decision by the executive board in August which had recommended acceptance of Los Angeles' plan to hold and finance the Games.

The granting of the games to Los Angeles ended months of talks between officials of the city, the IOC and the USOC over the drafting of rules and acceptance by all parties.

"This is fantastic news," said Los Angeles Mayor Tom Bradley. "It's a major achievement for the thousands of people who have worked so hard to return the Olympics to Los Angeles for the past 20 years. I've been very hopeful since the whole thing started."

Prognostics in 6th week

Readers are still holding a comfortable lead as the reader-staff prognostics battle enters its sixth week.

As in past weeks, readers are asked this week to predict only the score of the BYU-Oregon clash. In the remainder of the games, readers should predict the point spread and winning team.

All predictions must be brought to the Daily Universe, 534 ELWC, by noon Thursday.

game against Wisconsin, carrying a 13-0 lead into the fourth quarter before losing 22-19.

Oregon even had a chance to upset second-ranked USC several weeks ago until the fourth quarter of the game, when the Trojans picked off three passes and ran them back for touchdowns.

Brooks said that BYU isn't the only team with injuries. "We lost our starting center last week," he said.

Despite its record, Oregon has compiled some impressive statistics so far this season, including holding California to its lowest point total of the season. "We only allowed California 88 yards total offense in the first half," said Brooks.

Defensive strategy

The Duck coach said he has seen the films of the USU-BYU game and plans to defense the Cougars similarly. "Our receivers were open several times because of Argie blitzes," he said. "And Oregon doesn't plan to take that chance. If you blitz a lot you're going to get burned," he said.

The Ducks have a young defensive squad but Brooks said he feels it will be able to contain the Cougars. "Our defensive front has proven to be our strength," he said.

BYU and Oregon have played each other twice, with Oregon winning both games. The Cougars first traveled to Eugene in 1964, with Cougar quarterback Virgil Carter, in his first start with the BYU varsity, leading the team.

Oregon beat the Cougars 20-13 that year and won the rematch the following season.

Edwards said he feels the Cougars can win the Western Athletic Conference championship, despite their 3-2 overall season record.

BYU is 2-0 in WAC action and has this week off from conference competition before returning to the WAC title race at home against Texas-El Paso.

The UTEP game will be the first of a three-game home stand, which will also include contests with the Wyoming Cowboys and the San Diego State Aztecs.

Sally (Traci Wood) clings to Mason (Bruce Newbold) in a Mask Club performance of Kim Wright's one-act play "Addiction."

Musician to play in noon concert

Singer-songwriter John Canaan will perform tomorrow in the ELWC Reception Center. Canaan's appearance is part of a "spontaneous performance" program sponsored by the ASBYU Culture Office twice a month.

A native of San Diego, Canaan says he prefers performing "mellow music." "I specialize in writing songs," he says, "but I play a little of everyone else's." "Everyone else's" includes John Denver, Boz Skaggs, and the Beatles.

"I love writing songs because in them I can attempt to make sense out of what happens in life," Canaan says. "One of my more meaningful songs, 'That's OK I Don't Like You Either,' was written for a girl that had difficulty being interested. Since writing that song I have rededicated it every two or three weeks."

As well as writing and singing songs, Canaan accompanies himself on the guitar and piano. He says he enjoys playing his songs for people because "pathetically enough, they can usually relate to them."

On KBYU-TV

Marie Curie story dramatized

A special five-hour television series about the life and work of Marie Curie, the discoverer of radium and winner of two Nobel prizes, will premiere tonight at 9 on KBYU-TV, Ch. 11.

Hosted by Dr. Rosalyn Yalow, who in 1977 became the second woman ever to win a Nobel Prize for medicine, the program dramatizes Madame Curie's brilliant scientific career, a KBYU spokesman said.

Struggles as student

The series spans the years between 1886 and 1934, during which time Marie Curie struggles as a student in Paris where higher education was closed to women, and despite seemingly insurmountable odds, becomes one of the most accomplished and famous women in history.

"Marie Curie" was filmed on location in England and France, with Jane Lapotaire appearing as Madame Curie and Nigel Hawthorne as her husband, Pierre.

Marie is revealed as tenacious and indomitable, capable of great warmth and compassion, yet painfully shy. She emerges as a fairly feminist, although her self-perception undoubtedly did not include the concept as it is understood today.

The first episode takes Polish-born Maria

Skłodowska from her position as a governess for a Polish family to her graduation in physics at the Sorbonne in Paris. The only woman in the class, she attained the top rank.

At first, Marie wishes to return to her native Poland to teach students deprived of the knowledge she has obtained.

Remains in Paris

But she is convinced by her father, Józef Skłodowski (Dennis Carey) and by her new friend, Pierre Curie, that pure scientific research could not flourish in Poland due to its politically repressive atmosphere. She chooses to remain in Paris to pursue her life-long scientific inquiry.

She marries Pierre and, together they discover radium, but eventually begin to suffer the effects of its poisoning.

Pierre is killed in a street accident and Marie dies in 1934 of aplastic anemia, brought on by prolonged exposure to radiation.

Based on a book by Robert Reid, "Marie Curie" was written for television by Elaine Morgan.

The program is produced by Peter Goodchild, who also produced the television series "Microbes and Men."

Marie Curie, played by Jane Lapotaire, works diligently on her discovery of radium, in a dramatization of her life, to air on KBYU.

Marriott

Not just a rich man

By WENDY OGATA
University Staff WriterUniversity photo by Karen Patterson
J. WILLARD MARRIOTT
... "hardworking businessman"

For most BYU students, the name Marriott is synonymous with the giant building where devotions, firesides and basketball games are held. The man or whom that building is named is a giant in his own right.

J. Willard Marriott, a businessman, a millionaire, a philanthropist and a devout Mormon.

Marriott was in his home state of Utah last week attending the LDS general conference in Salt Lake City. On Friday and Saturday he was honored as the BYU Homecoming Parade Grand Marshal.

Born in 1900, 30 miles north of Salt Lake City in what was once called Marriott City, in 1910, Bill Marriott, the son of a Mormon who grew up as a good Mormon boy and served a mission in the Eastern States Mission.

By 1946 his company, started as a boot bean stand in Washington, D.C., had grown into a multi-million dollar corporation and he was called to serve as a speaker at the 1947 meeting of the Washington D.C. Stake's presidency. He took over the position from his friend, Ernest L. Wilkinson, former president of BYU.

Marriott is known for his generous donations to various institutions. The church and the universities in Utah are my main concern. I graduated from the University of

"I was up at the University of Utah's library the other day," he said. "They opened up their vault and showed me all the manuscripts they have written by Brigham Young. We have a Book of Mormon signed by Joseph Smith in that vault," he said with pride.

Marriott's corporate interests include hotels, restaurants, airline catering services, a Mediterranean cruise line and amusement parks. Marriott Corporation plans on opening seven hotels in the Midwest.

Besides working as chairman of the board for the Marriott Corporation, he is also serving as chairman for the Honor America Committee.

"A lot of prominent people in the nation are part of this committee," he said. "Our main purpose is to promote America, its institutions and the free enterprise system."

The committee was started in the late 1960's when everyone started burning flags. "On July 4, 1970, we had an Honor America Day in Washington, D.C. We had Bob Hope and Billy Graham speak, and over 400,000 people were in attendance, making it the largest gathering of people in the history of Washington, D.C.," he said.

When he isn't busy with the Honor America Committee and his multi-billion-dollar corporation, Marriott relaxes with his family. He and his wife, the former Alice "Allie" Sheets, have two sons and several grandchildren.

Cadets stay afloat in homemade poncho-rafts

Do you know how to make a water raft with two Army ponchos?

The Army ROTC students now at Lake State Park, involved in a project for Army ROTC, said making rafts was the first of a series of labs which cadets have the opportunity actively participate.

The raft-building lab, conducted at Lake State Park, involved making rafts with ponchos and crossing the river.

Debbie Burch, a senior in the Army TIC program majoring in family resource management, explained that a combat situation "you can build a raft and put your M-16, boots and helmet in the raft and protect them in the water."

The second half of the military lab consisted of crossing the river with the use of ropes. A long rope was tied around a tree, while the opposite sides of the river. Each end then tied another rope securely and his waist and, with the use of a p link, secured himself to the rope stretched across the river. The cadets themselves across the river, using a hand-to-hand technique.

OPINION — COMMENT

Unsigned editorials represent the position of the editorial board of the Daily Universe.

Accidents prove need for Canyon Road work

How many fuel tankers will overturn on Provo Canyon Road before the Utah Department of Transportation will make the necessary improvements in the highway?

The recent accident with an overturned 9,000-gallon diesel fuel tanker and a car is typical of the frequent accidents which occur as oil tankers attempt to turn west off Provo Canyon Road onto 800 North in Orem.

Not only is this dangerous to life and property, but the accidents pose an environmental threat in the possibility of a crude oil spill into Provo River.

Traffic was knotted up for 3 1/2 hours because of the Monday accident. This unnecessary congestion inevitably led to frustration for drivers who had no alternative but to wait out the holdup.

The heavily traveled road serves 7,000 cars, 1,100 light trucks and 500 heavy trucks a day. A safety engineer at the Utah Department of Transportation estimated that there are ten deaths a year on Provo Canyon Road. In 1976 there were 20 accidents between the north city limits of Provo and Olmstead Junction.

So why isn't something done?

Nothing will be done until the environmental branch of the Transportation Department produces an environmental statement which has taken eight years of study so far. The 492-page statement must pass the scrutiny of five agencies, including the Federal Highway Administration and the fanatical Environmental Protection Agency.

Why eight years? Procedural details, they say. Procedural details such as bicycle paths and sewer line studies have prevented the project from moving forward as it should.

Can it be that the Transportation Department has cowered to the howls of the environmentalists? When human lives are lost for the sake of environmental studies, it seems that priorities have slipped.

There is no doubt that Provo Canyon Road is beautiful. But the beauty of the outdoors was not meant to enjoy from car windows. Until people get on a horse or go for a long hike through this beautiful area, they cannot appreciate nature at her best. A little less beauty on the highway should not be any threat to a true lover of nature who can retreat into the unspoiled backland.

The road was made to travel on and if it is aesthetically pleasing at the same time that's a great bonus. But sacrificing the safety of motorists for the sake of a few birds who would have to move their nests is illogical.

The Department of Transportation needs to show some backbone. They must quit twiddling their thumbs and finish the environmental impact statement so that work can begin on the widening of the road immediately. The environmentalists can howl, but progress must go on.

Meanwhile, truckers must use common sense and not speed down the road like they are in Volkswagens. And when possible, they should choose another route.

And environmentalists can think about the option: would they prefer to see a few birds inconvenienced by moved nests or oil in the water of Provo River. The latter environmental hazard is a good deal more threatening.

Locker room court ruling raises question of equality

New York's recent court ruling, allowing newswomen access to men's locker rooms for the purpose of interviewing sports figures, once again raises the question of the legal avenues which would be open after passage of the controversial Equal Rights Amendment.

While there are elements of humor in the fact that five newswomen were allowed to "invade" as the Associated Press termed it, the Yankees' clubhouse locker rooms last week, the question of precedent versus interpretation of law in the ERA's amendment may again be raised.

It has been argued by proponents of the proposed amendment that the passage would only guarantee equal rights under law for women, and not usher in a unisex oriented society.

BOY WONDER, WE'VE GOT TO FACE REALITY—WE'VE FAILED. SOME TASKS ARE EVEN TOO GREAT FOR US SUPER HEROES.

GOLLY GEEZ BATMAN, IT JUST DOESN'T SEEM FAIR!

WE'VE DONE ALL WE CAN, FAIR OR NOT ROBIN, THESE THINGS TAKE TIME.

CHIN UP, OLD BOY. WELL FIND A PARKING SPACE TOMORROW.

SOB

BATMAN

MANHATTAN BEACH, CALIF.

A 9,000-gallon diesel fuel tanker overturned and landed on top of a Ford Torino Monday. No one was seriously injured in the accident, which occurred at the mouth of Provo Canyon. (see editorial)

When I was first taught the rules of thermodynamics and the concept of entropy, they seemed merely another manifestation of the lunatic ideas one encounters everyday in the physics department. I dutifully memorized the laws, repeated them on my exam, and then forgot them. However, the longer I remain at BYU the more I am convinced my physics teacher did indeed know what he was talking about.

For the benefit of those who have yet to experience the joys of Physics 100, entropy involves the notion that matter is continually being converted into little particles of energy floating through the atmosphere. As long as one does not discover how to remove energy from matter, this means that eventually the entire universe will become a chaotic mass of dispersed and therefore useless energy.

Evidences of entropy are abundant on our campus. One need only travel west of the library to discover what is sometimes referred to in jest as the "gravel pit," an obvious example of disorder deteriorating into disorder.

Secondly, any kind of social activity should be abolished. An observer at a

other instances of this theory at work are exhibited at the Cougar-East, where huge amounts of matter (occasionally described as "food"), are casually converted into energy used by students bodies for such trivial activities as studying.

Of course, the most flagrant example of matter-turned-chaos can be seen in *The Daily Universe* office. Here, frantic minds expend time, energy and paper in creating a product which usually ends up in the wastebasket.

This is not a fault of our campus newspaper only; the New York Times is not better; the gilded monster of progress before humanity takes a pride in quality of manufacture. Money isn't worth the loss of life.

Intellectual activities are the worst affront to conscientious entropy obstructionists. Students use a phenomenal amount of mental energy as part of the education process. The television is an entropy-preventing tool. Used correctly, it could end all such useless mental energy-wasting.

If is commendable that the university has already seen the grave threat presented by entropy and has taken some steps in its own to halt the process, namely the cementing in of the "Y". It was a crime to use all that student energy in annually whitewashing a bunch of stones.

Of course, the ultimate answer to entropy is a very simple one: merely lay in bed all day long. I am pleased to report that several students are intelligent enough to have already begun implementing this principle. Let us unite our efforts that we may make a significant contribution to world-wide entropy prevention.
